

REMARKS

Claims 1-25 are currently active.

Claims 1, 20 and 21 have been amended. Antecedent support for the amendments to the claims is found on page 7, line 24.

Claims 22-25 have been added. Antecedent support for Claims 22-25 can be found in Claims 7 and 8.

The Examiner has found Claims 13-19 allowable, and has objected to Claims 3-12.

The applicant acknowledges the provisional double patenting rejection regarding Claims 1-10 and 13-21.

The Examiner has rejected Claims 1, 20 and 21 as being anticipated by Davis. In view of the amendments to these claims, applicant respectfully traverses this rejection.

In pertinent part, Davis teaches an infrared source 20, such as a black body, glow bar, or lamp is collimated to form a beam which is directed onto a mirror 22 located at

the upper focus 14. See column 5, lines 14-18. Claims 1, 20 and 21 now have the limitation of "a structured light source for producing light". The infrared source 20 taught by Davis is not a structured light source. Accordingly, Claims 1, 20 and 21 are not anticipated by Davis.

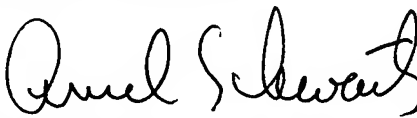

The Examiner has rejected Claim 2 as being unpatentable over Davis.

Applicant respectfully traverses this rejection. Claim 2 is dependent on parent Claim 1 and is patentable for the reasons Claim 1 is patentable.

In view of the foregoing amendments and remarks, it is respectfully requested that the outstanding rejections and objections to this application be reconsidered and withdrawn, and Claims 1-25, now in this application be allowed.

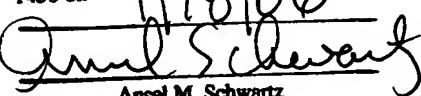

Respectfully submitted,

KENNETH PERLIN
